

Neo Mwambi

Johannesburg, South Africa

079 636 1071 | neomwambi@icloud.com | <https://www.linkedin.com/in/neo-m-2a088a128/>

PROFESSIONAL SUMMARY

Results-driven Data Engineer with a strong foundation in Mathematical Statistics and Financial Modelling. Proven expertise in designing, building, and maintaining robust data architectures across hybrid environments (Azure Cloud and on-premises SQL Server). Adept at building meta-data-driven ETL pipelines, optimising data warehouse performance using T-SQL, and developing scalable, self-service data products. Passionate about driving engineering efficiency, collaborating with cross-functional risk and architecture teams, and maintaining the highest standards of data integrity, security, and customer fairness within fast-paced financial environments.

SKILLS

- **Technical Skills:**

- **Data Engineering & Cloud:** Microsoft Azure (Data Factory, ADLS Gen2), Databricks, MS Fabric, Synapse Analytics, robust ETL/ELT pipelines, Azure DevOps, CI/CD, Infrastructure-as-Code (IaC)
- **Databases & Programming:** SQL Server, T-SQL (Stored Procedures, Functions), SSIS, MySQL, Python, C++, VBA, Database Querying & Tuning
- **Data Architecture & BI:** Data Warehousing, Data Modelling (Star Schema, Snowflake Schema), Lakehouse & Medallion Architecture, Azure Analysis Services, Power BI

- **Analytical Skills:** Data as a Product, Data Ingestion & Transformation, Risk Analytics & Reporting, Quality Assurance & Governance, Predictive Modelling, Technical Analysis, Data Integrity

- **Business Skills:** Cross-functional Collaboration, Agile/Squad Environments, Strategic Problem Solving, Mentorship, Treating Customers Fairly, Integrity & Ambiguity Management

EDUCATION

University of South Africa

February 2025 - November 2025

BCom Honours in Financial Modelling with Distinction

- Forecasting (**Distinction**), Stochastic Modelling (**Distinction**), Options, Futures, and Other Derivatives (**Distinction**), Financial derivative instruments (**Distinction**)
- Research Paper – Large Scale Data Manipulation [**Predicting Formula One Driver and Constructor Championship Outcomes Using Time Series Analysis on Large-Scale Motorsport Data (2016-2021)**] (**Distinction**)

University of Johannesburg

February 2020 - December 2022

BSc Mathematics and Mathematical Statistics

- **Distinctions** in Computer Science 1A, Computer Science 1B, Applied Mathematics 1A, Applied Mathematics 1B, Mathematics 2A

University of Cape Town

July 2023 - November 2023

Data Analysis Certificate

- Fundamentals of data-driven decision-making, Research questions for data analysis, Organising data in Microsoft Excel, Statistical analysis using Microsoft Excel, Databases and SQL, Interpretation of outcomes, Data presentation and visualisation, Looking towards the future

Parktown Boys' High School

Grade 12 NSC - passed with bachelor's degree entrance

- Mathematics (**Distinction**), Life Orientation (**Distinction**), Physical Science, Life Science, Advanced Programme Mathematics

WORK HISTORY

DATA ENGINEER

October 2023 - Current

MobiLife Technology Services Pty (Ltd) - Fourways

- Designed, built, and monitored robust ETL pipelines using Microsoft Azure (Data Factory) to ingest and transform data across multiple sources in a hybrid environment.
- Built and maintained on-premises SQL Data Warehouse objects, utilizing strong T-SQL and MySQL programming to develop complex stored procedures, functions, and views.
- Developed business-focused data products and automated batch workflows, applying modern data warehouse modelling methodologies to ensure data is reliable and optimised for end-users.
- Spearheaded the technical execution of five major data migration projects (including migrating policy data from Standard Bank), ensuring rigorous data integrity, auditability, and alignment with risk management best practices.
- Collaborated closely with multidisciplinary teams, data analysts, and architecture stakeholders to define test criteria, understand business requirements, and deliver cohesive engineering strategies.
- Optimised complex SQL queries to significantly improve performance, reduce execution time, and support efficient batch processing while monitoring server CPU and memory stability.
- Supported operational duties by maintaining data security, transaction monitoring, and validation checks, aligning with a culture focused on engineering best practices.

INVESTEC GRADAUTE TECH EXPLORE FINALIST

July 2023 - August 2023

Investec - Sandton

- Selected to participate in the Investec Tech Explore programme, a two-day initiative for final-year students and graduates in technology-related fields. Participated in a business case exercise and engaged with technology professionals, stakeholders, and senior executives.

TUTOR

February 2021 to February 2022

University of Johannesburg - Auckland Park

- Tutor for the department of mathematics, tutoring first and second year students' mathematics.

CERTIFICATIONS

- Data Analyst Certification – University of Cape Town.
- Microsoft Certified, Azure Fundamentals - Microsoft.
- Excel Skills to Improve Forecasting, Decision-Making and Client Reporting – The Tax Faculty.
- Microsoft Power BI Data Analyst Associate (PL-300) Cert Prep by Microsoft Press
- Advanced SQL for Query Tuning and Performance Optimization
